Canada Launching DNSSEC Test-Bed for Country's .CA Domain

Oct 07, 2009 12:57 PM PDT | Comments: 0 | Views: 216

By [CircleID Reporter](#)

The Canadian Internet Registration Authority ([CIRA](#)) for the .ca country code Top-Level Domain yesterday announced the launch of a test-bed initiative for DNSSEC. CIRA's Chief Information Officer, Norm Ritchie who made the official announcement at the SecTor security conference in Toronto, says it began the process of implementing DNSSEC in early 2009 and the implementation date is set for 2010. So far, over 15 Top-Level Domains have already deployed DNSSEC including dot-gov and dot-org.
