TASK kicks off Canadian IT security week

26 October, 2007

TASK, North America's largest and most successful IT security user group, announced SecTor, Canada's premier IT security education conference, is being held on November 20-21, 2007 at the Metro Toronto Convention Centre.

Today's corporations are facing a multitude of security threats from external parties compromising data to internal risks posed by inadvertent employee error. To help address the latest worldwide digital threats, SecTor brings together the worlds' brightest and darkest minds to identify, discuss, dissect and debate these issues. Unique to Canada, SecTor provides Canadians and international visitors with an unmatched opportunity for IT professionals to collaborate with their peers and learn from their mentors while helping IT leaders determine how the strongest defenses can be mounted.

An international list of top-tier speakers from around the world including representatives from the U.S., Germany, Canada, and Poland will be presenting at SecTor. From Mark Fabro, an educator and consultant who has been recognized as one of the "25 Most Influential Consultants in the World" to Joanna Rutkowska, a recognized researcher in the field of stealth malware and system compromises, SecTor is attracting the best-of-the-best in the field of IT security.
